

Notes:
Maturity values for index-linked notes are approximations and include the accretion value of certain future interest costs using an assumption of an annual inflation rate: for RPI $3 \%$ until maturity; for CPI 2\% until maturity.
Debt type: PN=Public note issued under the $£ 5$ bn EMTN Programme, PPN=Private placement note, EIB=European Investment Bank term loan, Bank=Bilateral bank term loan.
To the period up to September 2023, Southern and Scotland transacted $£ 597 \mathrm{~m}$ and $£ 310 \mathrm{~m}$ respectively of CPI linked swaps that economically switch all or part of the notional principal of certain fixed rate debt instruments into CPI-linked debt instruments. These derivative instruments have a CPI-linked interest payment leg and CPI-linked maturity payment leg, and a fixed receipt leg matched to the fixed rate coupons of certain fixed rate debt instruments. More details can be found in note 21 to the financial statements, available at: https://www.sgn.co.uk/sites/default/files/media-entities/documents/2023-07/SGN-Annual-Report2023.pdf
